
Human-in-the-Loop Certifications

From individual capability to professional practice to enterprise deployment — a structured pathway built on the Human-Machine Co-Regulated Execution framework.

2026

Three tiers. One progression.

1

Entry · Open enrolment · €495 (50% scholarship available at €248)

Human-in-the-Loop Foundations™ (HILF)

The essential human capability layer for the AI era

€495

€248 scholarship

2

Professional · Application-only · €4,500 (50% scholarship available at €2,250)

Certified Execution Integrity Practitioner™ (CEIP)

Train to diagnose and reduce Human Debt®, Execution Debt®, and AI adoption failure using the patent-backed Human-Machine Co-Regulated Execution framework. Cohort-based, supervised application on a real organisational case.

€4,500

€2,250 scholarship

3

Enterprise · Application-only · €8,995

Certified Execution Integrity Partner™

For firms and senior practitioners operationalising Execution Integrity practice at scale — Pod design across business units, licensed methodology, and ongoing enterprise engagement.

€8,995

Human-in-the-Loop Foundations™

“The future of work will not belong to organisations with the most AI. It will belong to organisations whose humans can stay clear, accountable, emotionally regulated, and aligned with reality while AI accelerates everything around them.”

FOUR MODULES

MODULE 1

Judgement under acceleration

How to keep human judgement intact when AI produces answers faster than you can verify them.

MODULE 2

Accountability that survives automation

Staying answerable for outcomes when the work is shared with systems that report their own success.

MODULE 3

Reality alignment

Detecting when reported progress and actual execution diverge — before the gap becomes a failure.

MODULE 4

Emotional regulation at machine speed

Staying clear and regulated while the pace, volume, and pressure of work increases around you.

WHAT'S INCLUDED

- ✓ Self-paced foundations course (lifetime access)
- ✓ The Human-in-the-Loop capability model and working materials
- ✓ Practical reality-alignment and accountability exercises
- ✓ Certificate of completion
- ✓ Direct pathway into Certified Execution Integrity Practitioner™

€495

One-time · Lifetime access · 50% scholarship available at €248

The Five EI Competencies

1 Human Verification Density

How organisations maintain meaningful human review of consequential AI outputs.

2 Accountability Structures

How responsibility survives automation.

3 Execution Drift Control

How teams detect and correct divergence between intent and execution.

4 Correction Latency

How quickly organisations identify and respond to execution failures.

5 Execution Survivability (Inspectability)

How execution systems remain reliable under stress, scale, and uncertainty.

These five dimensions are formally measured in the Execution Integrity Score.

Certified Execution Integrity Practitioner™

Train to diagnose and reduce Human Debt®, Execution Debt®, and AI adoption failure using the patent-backed Human-Machine Co-Regulated Execution framework. Cohort-based, supervised application on a real organisational case.

INSIDE THE PROGRAMME — WEEK ONE

- ✓ The Execution Integrity model: where reported progress detaches from recoverable reality
- ✓ Human Debt® and Execution Debt® as measurable, compounding failure modes
- ✓ Cultural drift and AI adoption failure: diagnosing the human conditions behind stalled transformation
- ✓ The patent-backed Human-Machine Co-Regulated Execution framework
- ✓ Reading the diagnostic instruments: AIAP signals, Team Health, and Culture diagnostics

CERTIFICATION INCLUDES

- ✓ Live cohort-based certification programme
- ✓ Full diagnostic toolkit and practitioner methodology
- ✓ Supervised application on a real organisational case
- ✓ Certified Execution Integrity Practitioner™ credential on completion
- ✓ Pathway into the Certified Partner tier and the Execution Pods operating model

PRICING

Standard certification

€4,500

Admitted by application.

50% scholarship rate

€2,250

Students & emerging practitioners.

COMPETENCIES ASSESSED

- ✓ Human Verification Density — assessing and improving the density of meaningful human review across AI-assisted workflows
- ✓ Accountability Structures — diagnosing whether responsibility survives automation and AI handoff
- ✓ Execution Drift Control — identifying early signals of divergence between intent and execution

- ✓ Correction Latency — measuring how quickly failure is detected and corrected before it compounds
- ✓ Execution Survivability — evaluating whether the execution system remains recoverable under stress and scale
- ✓ Execution Integrity diagnostics — interpreting EI Score results and translating them into intervention priorities
- ✓ Human-in-the-loop governance — designing accountability and verification systems for AI-augmented organisations

Application-only. Cohorts admitted by application.

TIER 3 — ENTERPRISE

Certified Execution Integrity Partner™

For firms and senior practitioners operationalising Execution Integrity practice at scale — Pod design across business units, licensed methodology, and ongoing enterprise engagement.

PARTNERSHIP INCLUDES

- ✓ Pod design across business units
- ✓ Licensed methodology
- ✓ Ongoing enterprise engagement

€8,995

Application-only
